Maryland Product Photography

Name: _____

Phone: _____

Email: _____

Please describe the products you want to have photographed:

How many products need to be imaged?

Do any of the products require more than one image or view (e.g., front and back view)?

___ Yes ___ No

How many products require additional views?

What size are the products? (If size varies, please explain below.)

Please explain if product sizes vary:

What do you want for the background of the images? (If necessary, please elaborate in the following item.)

- White
- White with reflection below
- Black
- Black with reflection below

Explain any variations or particulars concerning the backgrounds you need:

It is typical for products to be photographed from a angle slightly above to show dimensionality. How will you want them photographed?

- From an angle slightly above
- From straight on

Are your products reflective in any way (e.g., glass, foil lettering, glossy surface, metallic)?

- Yes
- No

How many items are reflective and what is the nature of the reflectivity?

How do you intend to use the finished images? (e.g, web site, advertising – local or national, print)

What aspect ratio will the finished images need to be?

- Square (Amazon or similar)

2x3

4x5

Other: _____

What size in pixels do you need your finished images to be on the long side?

Is it important that your product be in sharp focus from front to back? (More expensive)

Yes

No

Do you need any 360° or 180° animations (product rotating on a turntable)

Yes

No

Where will the photography need to be done?

In studio (I will ship or deliver)

On location (more costly)

If you will ship your products to the studio, will you provide a return shipping label, or should return shipping be included in your final invoice?

Return is not necessary. Please discard after imaging.

Return label will be provided

Please invoice for return shipping

If the photography must be done on location, please explain where and other details:

Please explain any other particulars about that will help the photographer develop an accurate estimate.
